## LoA User Guide

## 12 Nov 2019

The essence of this change is the ability for you the user to directly attach a Letter of Authority (LoA) to a porting request, rather than having to separately email it as now. This will both save you work, and be more reliable and secure for both of us.

And here is the	equivalent page in the new system.		

Notice the new line of entry, circled in blue.

Using the new *Choose File* button, the user can to navigate to and attach a *.pdf* or *.jpg* LoA file, up to a maximum size of 3MB.

This is optional, you can still proceed without attaching one if you prefer.

We see here the LoA file called <i>oab.pdf</i> has been chosen. Note that it is still mandatory to answer Yes to the question just above the button if you wish to proceed.		Do you have a Letter of Authority from the Customer? Customer's Letter of Authority (max size 3 MB)	Yes  Choose file oab.pdf
