
Chargeable Number Translation Service (NTS)

This service enables customers who use our numbering services to connect the numbers to PSTN as well as VoIP. It offers greater flexibility for redirects, voicemail and time based routing.

It is designed for service providers and resellers who provide number services to customers who require PSTN as well as VoIP connectivity.

Why choose Magrathea for this service?

- We offer high quality call translation, terminating your calls via our reliable interconnects with major carriers
- We have a user friendly API, which makes the service very easy to use
- Numbers can be changed from VoIP delivery to PSTN and back in real time depending on the customer's requirements
- Our pricing is very competitive

How it works

A chargeable NTS account gives you the flexibility to be able to divert any of our number ranges to any destination in our rate sheet. We debit the cost of calls in real time from your prepaid account giving you full control over your spending.
