International Toll-Free Numbering

We can supply international toll-free (ITFS) numbers for an extensive range of countries, enabling you to provide free to call numbers for your customers to access your services when abroad.

You can also use an ITFS number as your international contact number.

This service is designed for telecommunication companies and resellers offering services to customers with international presence who require free phone access for their clients.

Why choose Magrathea for this service?

- We deal with a range of high quality suppliers so we can provide the lowest prices for the customer
- We have excellent call completion quality over PSTN as well as VoIP protocols
- We have good relationships with our suppliers ensuring a fast and efficient service
- Our simple pricing models make it easy for you to operate a truly international service for your customers

How it works

We can complete calls either to your existing PSTN number or to you over IP. Calls originated by the international carrier are delivered to us via our dedicated E1 connections. We then connect calls to you either to a PSTN number or to your SIP address.

For more information contact us today on 0345 004 0040 or email sales@magrathea-telecom.co.uk
