## Number Porting

We offer a number porting service between Magrathea and many other major networks.

This service is designed for telecommunication providers taking over an end user service from other companies.

### Why choose Magrathea for this service?

- We have a knowledgeable and efficient porting team with experience built up over a number of years
- Porting numbers into Magrathea means that customers can benefit from our high quality inbound number service
- An online portal is available for the submission and tracking of porting requests

### How it works

Magrathea is able to use its direct relationships with BT and other carriers to help provide number portability to your customers. We have arrangements to port both UK wide geographic and non geographic area codes, allowing your customers to keep their existing number when they move their service to you.

Having worked closely with the network operators, Magrathea is able to manage a simple porting process that will migrate customers to your service with minimum cost and disruption. Our experience of porting ranges from simple residential telephone lines to complex multi-number switchboards.

Magrathea also has contracts with many of the leading VoIP companies in the market and can help you migrate numbers between them using the same tried and tested procedures.
